CYBER LAWS AND FORENSICS

Module-wise Important Topics & 4-Mark / 8-Mark Preparation Guide

Basis: Uploaded Module 1–4 notes, CLAF Question Bank and Series Test-I paper image. Priority is estimated from topics explicitly asked or repeated in the supplied material; it is not a guaranteed prediction.

Your answer-length rule: 4 marks = about 2 handwritten pages; 8 marks = about 3–4 handwritten pages. For 4 marks, write a brief introduction and 4–6 explained points. For 8 marks, use an introduction, headings, detailed points/examples and a short conclusion.

Note on marks: The uploaded test and QP Bank show 3-mark and 6-mark questions. The table adapts those topics to your requested 4-mark and 8-mark preparation lengths.

MODULE 1 — Cyber Laws, Cyberspace & Intellectual Property

Topic	4m	8m	Priority / guidance
Importance/objectives of cyber laws: cybercrime prevention, privacy, e-commerce, IPR and national security	High	Very High	Series Test Q7; QP Bank long question
Three reasons traditional penal laws failed to address cybercrime	High	Very High	Explicitly asked in Series Test Q7
Online copyright infringement and mechanisms: downloading/uploading, linking/framing, software piracy; protection methods	High	Very High	Series Test Q8; QP Bank
Cyberspace deception: cybersquatting, typosquatting, name/brand/combo squatting	Very High	High	Typosquatting asked in Part A Q3
Historical perspective of cyber laws; early developments, internet boom, IT Act 2000, global trends	Medium	High	QP Bank long question
ISP in cyberspace: definition, role and services	High	High	QP Bank
Patent protection in India: Sections 3(k), 39 and 10 as explained in your notes	Medium	High	QP Bank combines ISP and patent protection
Short topics: objective of cyber laws, two copyright-violation examples, framing vs hyperlinking	Very High	Medium	Quick revision for short questions

MODULE 2 — IT Act 2000 & Punishments

Topic	4m	8m	Priority / guidance
IT Act 2000: objectives, legal recognition of electronic records/signatures, e-commerce and cyber offences	Very High	High	Series Test Q4; QP Bank
Section 79: requirements for intermediary exemption; offences by intermediaries	Very High	High	Series Test Q5–6
Section 66F: cyber terrorism — definition, essential ingredients and punishment	Medium	Very High	Series Test Q10
Definition and classification of cybercrimes/conventional offences in cyberspace	High	Very High	QP Bank long question
Section 70: protected systems, unauthorized access and government powers	Medium	Very High	QP Bank long question
Privacy/confidentiality: Sections 66E, 72 and 72A, using the notes' explanations	High	High	QP Bank long question
Sections 71 and 84C: misrepresentation and attempt to commit offences	High	Medium	QP Bank short questions
Key offence-and-penalty table: Sections 43, 65, 66, 66B–66E, 66F and 67	High	High	Memorize exact section, offence and penalty from Module 2

MODULE 3 — Computer Crimes, Policy Violations & Evidence

Topic	4m	8m	Priority / guidance
Categories of computer crime: computer as target, as instrument, and crimes associated with computer prevalence	High	High	Core overview in Module 3
Types/examples: phishing, copyright violation, cracking, cyberterrorism, cyberbullying, cybersquatting, malware, data theft, fraud, ransomware, spoofing, typosquatting and unauthorized access	High	Very High	Group the examples and briefly explain each
Company policy violations: common types, causes and consequences	High	High	Dedicated section in Module 3
Preparing a case for cybersecurity investment or a cyber incident	Medium	High	Learn the steps/headings from notes
Securing digital evidence: identification, preservation, collection, analysis and documentation	High	Very High	Core forensic workflow
Key principles: forensic image, preserve originals, chain of custody, documentation, secure storage, minimize changes and volatile data collection	High	Very High	Strong long-answer topic
Industrial espionage investigation: detection/monitoring and investigation steps	Medium	High	Prepare after the higher-priority topics

MODULE 4 — Digital Data, Storage & Forensic Foundations

Topic	4m	8m	Priority / guidance
Digital data/storage systems; data integrity, security and accessibility; file, block and object storage	High	High	Module 4 opening topic
Storage devices: HDD, SSD, cloud, optical storage and magnetic tape	High	High	Learn uses and differences
Boot sequence: power-on, POST, boot-device selection, boot loader, OS loading, kernel initialization and login	Very High	High	Memorize steps in order
Disk drives/HDD components: platters, tracks/sectors, actuator arm, read/write head and interfaces	High	High	Structured 4-mark answer
SSD: definition, advantages, types and uses	High	High	Compare with HDD using notes
File systems: FAT32, NTFS and ReFS; strengths, limitations and use cases	High	Very High	Prepare a comparison table
Other headings in remaining Module 4 notes	Medium	High	Review all remaining headings/diagrams in your full notes

Highest-priority revision list

1. Importance of cyber laws + three reasons traditional penal laws failed.
2. Copyright infringement mechanisms and protection methods.
3. Typosquatting/cybersquatting and cyberspace deception.
4. IT Act 2000 objectives and offence/punishment table.
5. Section 79 intermediary exemption and offences by intermediaries.
6. Cyber terrorism under Section 66F.
7. Classification of cybercrimes with examples.
8. Securing digital evidence, chain of custody and forensic principles.
9. Boot sequence; HDD vs SSD; FAT32 vs NTFS/ReFS.
10. Privacy/confidentiality sections and protected systems.

Series Test-I paper mapping

Topic	4m	8m	Priority / guidance
Part A Q1 — Primary objective of cyber laws	Module 1	Short	Definition and purpose
Part A Q2 — Two copyright-violation examples	Module 1	Short	Illegal downloading/uploading, software piracy
Part A Q3 — Typosquatting	Module 1	Short	Definition and example
Part A Q4 — Objective of IT Act 2000	Module 2	Short	Legal recognition, e-commerce, cyber offences
Part A Q5–6 — Section 79 and offences by intermediaries	Module 2	Short	Requirements and key points from notes
Part B Q7 — Importance of cyber laws and failure of traditional penal laws	Module 1	Long	Top priority
Part B Q8 — Copyright infringement mechanisms	Module 1	Long	Top priority
Part B Q9 — Cybercrime definition/classification	Modules 2–3	Long	Use the supplied notes' categories
Part B Q10 — Cyber terrorism under Section 66F	Module 2	Long	Top priority

Study rule: Use your uploaded notes as the source. Where a question asks for section numbers or punishment, learn the exact version shown in your Module 2 notes. Priority means “study first,” not “definitely appearing in the exam.”
